github.com/nyckolas-python
linkedin.com/in/nyckolas-python
email: nyckolas.python@gmail.com

TECHNICAL SKILLS

Frameworks:
Django, FastAPI, Flask

Databases:
PostgreSQL, Redis, SQLite

Cloud & DevOps:
AWS (EC2, EKS, RDS, SQS, SNS, S3, OpenSearch)
Docker, Kubernetes, Terraform, Jenkins, Linux

Monitoring:
Prometheus, Grafana, Kibana, NewRelic
Messaging & Async:
AsyncIO, RabbitMQ, Celery

Frontend:
HTML, CSS, JavaScript, Jinja2, Tailwind, jQuery, Chart.js

TRAININGS & COURSES

AWS:
AWS Cloud Practitioner
GoogleSkillboost:
GCP
Udemy:
Docker
Networking Concepts with Socket Programming - Academic Level

SUMMARY

Python Backend Engineer with 5+ years of experience building scalable backend systems, high-load services, and distributed microservice architectures.

Experienced in system design, performance optimization, and cloud-native development using AWS, Kubernetes, Docker, Terraform, and CI/CD pipelines.

Strong focus on reliability, scalability, and maintainability of production systems, as well as improving engineering processes and deployment workflows.

Actively use AI-assisted development tools to improve productivity, code quality, and documentation.

PROFESSIONAL EXPERIENCE

[03.2025 – Present] 1 years+
ZONE3000 • Python Software Engineer
Project: Highload Backend services for DNS domain platform (DNS authoritative servers, domain registrar and provider services).

Key achievements:

- Developed and maintained high-load event-driven microservice system (7 microservices + monolith). Deployed and supported services in AWS Kubernetes;
- Improved performance of high-load service by ~140% migrating hot data from PostgreSQL to Redis;
- Introduced AI-assisted agent-first development workflow, improving team productivity by ~30–50%;
- Participated in system design, architecture discussions, CI/CD improvements and performance optimization;

Stack: Python 3.12, Django 5.2, PostgreSQL, Redis, AWS (EKS, RDS, SQS, SNS, OpenSearch), Kubernetes, Terraform, Jenkins, Docker, CI/CD, Prometheus, Grafana, NewRelic.

SOFT SKILLS

- Focus on code quality, maintainability, and long-term system stability;
- Continuous learning and adoption of new technologies;
- Engineering ownership and responsibility for production systems;
- Clear technical communication and architecture discussions;
- Problem-solving and debugging complex distributed systems;
- Collaboration, code reviews, and knowledge sharing;
- Focus on continuous improvement and engineering best practices.
- Active use of AI tools to improve development productivity, code quality, and documentation.

LANGUAGES

English:
intermediate
Ukrainian:
native

MY HOBBY

My hobbies are marathon running and playing football.

[12.2022 – 01.2025] 2 years 1 month
FCN • Python Software Engineer

Project: CRM for US healthcare staffing company, later transformed into SaaS platform.
Key achievements:

- Migrated system to multi-tenant architecture;
- Replaced third-party SMS provider by designing custom SMS system using Django Channels and Twilio, reducing monthly costs by 100%;
- Participated in transformation of monolithic CRM into SaaS platform;
- Led infrastructure migration from DigitalOcean to AWS, achieving 99.9% uptime and improved system stability;
- Reduced infrastructure costs by 45% by moving static content to AWS S3.

Stack: Django (Django Channels, DRF, Social-Auth, OTP, 2FA, Permissions, View Sets, Jinja), Firebase Cloud Messaging, PostgreSQL, Celery, Redis, TWILIO API, Stripe API, FullCalendar.js, AWS EC2, AWS S3, BitBucket.

[2022 – 2022] 3 month
Universal Auto • Python Software Engineer (Startup)

Project: Taxi Service Integration Platform with Uber, Bolt, Uklon.
Stack: Docker, Django, DRF, Postgres, Selenium, Celery, Redis, Swagger

[2022 – 2022] 3 month
NDA • Python Software Engineer

Project: FastAPI Web Service with OCR (optical character recognition) tool.
Stack: FastAPI, Threading , Multiprocessing, Tesseract, PyPDF, AspriseOCR
Key achievements:

- Developed a high-performance OCR web service that processes and extracts text from multiple document formats.

[02.2021 – 03.2022] 1 year 1 month
YOUCAN Founder • Python Software Engineer

Project: E-commerce Data Analytics Platform
Key achievements:

- Successfully scaled to monitor 10+ e-commerce stores simultaneously;
- Eliminated 100+ hours of manual data collection monthly;
- Reduced data processing time by 70% through optimized scraping algorithms;

Stack: Flask, SQLAlchemy, SQLite, Pandas, BeautifulSoup4. Built reporting dashboards using jQuery and Chart.js.

EDUCATION

[2024] – [2025]
Central Ukrainian National Technical University (CNTU)
Master's Degree in Computer Engineering (with Honors)
[2007] – [2012]
Kharkiv National University of Radioelectronics
Bachelor's Degree in Economic Cybernetics
- Developed strong analytical thinking and self-learning skills.
